Width	899 mm
Height	3309 mm
Weight	350 kg

The Hortiwash is used for cleaning gutters and can also be equipped with a pendulum sprayer to wash the glass on the inside of the greenhouse. Turbo nozzles are used to clean the gutters, which clean even the most filthy parts. The pipe rail trolley is made of coated steel, which makes the machine last longer and does not corrode. The entire trolley is also IP-66 certified.

The batteries of the Hortiwash guarantee a continuous operation of approximately 12 hours. Furthermore, the wheel sets can be adjusted on the pipe rail width of the greenhouse without changing the axles. The wheel sets are adjustable for a center to center size between 420 and 600 mm.

Hortimat customizing work

Hortimat can design the offered machine to exact the customer requirements. Optionally we constructively adjust the machine or we install new operating systems. We also deliver tailor made solutions in the form of logistic conveyor belt systems and we think along with the customer for custom made solutions.

Why Hortimat

- + Adapting / modifying of used machines to desired specifications of the customer
- + Applying of new 2023 operating systems on used machines
- + New Hortimat range of products
- + Service and warranty by own technical specialists
- + Solid revision; guarantees a long lifetime
- + Individual advice about logistics matters, such as: grading machines, processing areas
