

## Greenhouse roofwasher

brandnew

### Especificaciones

<b>Tipo</b>	Roofmaster Light
<b>Marca</b>	Besseling
<b>Código</b>	20490

Suitable for	<b>Cleaning of greenhouse roof</b>
Wheelbase	<b>1250mm</b>
Displacement dock	<b>Included</b>
T55 Pump	<b>Optionally available</b>
Extra hose/cable	<b>Optionally available</b>
Control	<b>PLC controlled</b>

20490-V23032901-ES

**Renewed  
Quality  
Machines and  
Materials**

**Hortimat** - Vlotlaan 192, 2681  
TV Monster, The Netherlands

Maximum speed      **20/30 meter per minute**

Center to center  
distance      **4.000 mm**

Fuel consumption      **3,5 KW**

Weight      **537 kg**

Power supply      **400 V, 3 phases, zero + earth, 50 Hz**

Year of manufacturing      **New**

Plants grow faster when they receive more light. That's why it's so important for greenhouse roofs to remain clean. Washing a greenhouse roof by hand isn't an option. So it's not surprising that many greenhouse growers opt for a Roofmaster Light washing system.

The greenhouse roof washing system consists mainly of the roof washer itself and a platform. The system can be moved along a greenhouse's gable via a rail attached to the greenhouse. The roof washer stands in the gutters on the platform, which is suspended from the rail.

The platform moves the roof washer to the peak that is to be washed. The platform has ramps to connect it to the greenhouse's gutter. The roof washer then moves across the greenhouse roof via the gutters, while washing the roof. When the roof washer reaches the end of the roof it returns to the platform, which then moves the roof washer on to the next peak that is to be washed.

New ideas and technology resulted in a new design roof washer: Roofmaster Light.

Hortimat is official dealer of the Roofmaster-series!

## Hortimat obras de hecho a medida

Hortimat puede diseñar la máquina ofrecida para cumplir los requisitos del cliente. Opcionalmente, ajustamos de forma constructiva la máquina o instalamos nuevos sistemas operativos. También ofrecemos soluciones a medida en forma de sistemas de cinta transportadora logística y pensamos junto con el cliente en soluciones personalizadas.

## Porqué Hortimat

- + Adaptación / modificación de máquinas usadas a las especificaciones deseadas del cliente
- + Aplicación de nuevos sistemas operativos 2023 en máquinas usadas
- + Nueva gama de productos Hortimat
- + Servicio y garantía por especialistas técnicos propios
- + Revisión sólida; garantiza una larga vida
- + Asesoramiento individual sobre cuestiones de logística, como: máquinas clasificadoras, áreas de procesamiento
